The Joseph Palmer & Sons Growth Portfolio

The Joseph Palmer & Sons 'Growth' portfolio has been operating for many years and has an objective to provide a combination of long term capital growth and satisfactory income through exposure to a broadly diversified portfolio of investments, both within Australia and globally.

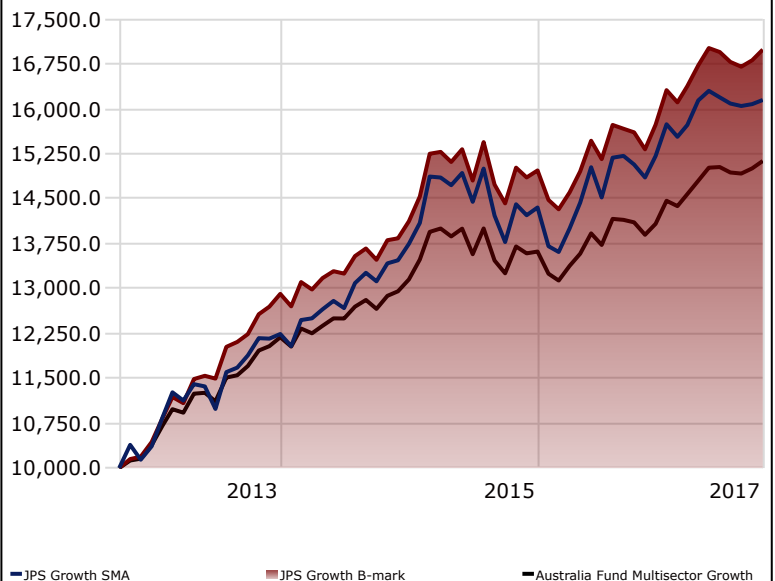

The portfolio forms the indicative model for those clients of Joseph Palmer & Sons who have contracted to have their growth portfolio managed.

The Joseph Palmer & Sons 'Growth' portfolio is typically suitable for investors who:

- Seek a relatively good level of long-term growth on their investment capital and a satisfactory level of income;
- Are willing to accept short-medium term capital volatility as a trade-off for long term capital growth;
- Are prepared to invest for the suggested minimum investment timeframe of five years and accept the risk of price fluctuations, particularly over shorter periods, and understand that capital preservation is not guaranteed.

Growth of \$10,000 invested five years ago

Time Period: 01-Oct-12 to 30-Sep-17

The performance shown represents performance of model portfolios that are periodically restructured and rebalanced based on the impact of economic and market factors that influence Joseph Palmer & Sons' decision making on asset allocation. It is for this reason that client accounts may not have achieved exactly the same returns as the underlying model portfolios. The performance of the model portfolios is based on the estimated performance of the investments included in the respective portfolio and reflects the performance of similar models managed by Joseph Palmer & Sons that may be for periods prior to the establishment of an individual client's managed portfolio. These performance figures have not been audited by an external body. The model portfolios' returns are gross and take no account of any platform provider's or investment management charges.
